ANUGRAH PATRA

Software Engineer

Bandung, Indonesia | +62 821-1716-0084 | anugrahpatra.24@gmail.com
LinkedIn | Portfolio: http://172.93.188.10/

SUMMARY

Software Engineer with 7+ years of experience building backend, frontend, and distributed systems. Experienced in fintech, enterprise software, real-time messaging, and Web3 integrations. Hands-on with Go, Java, Node.js, TypeScript, React, microservices, and event-driven architecture, with end-to-end ownership from requirements and implementation through testing and deployment.

TECHNICAL SKILLS

Languages & backend: Go, Java, Node.js, TypeScript, PHP, Spring Boot, NestJS, Laravel
Frontend & mobile: React, Next.js, Flutter, Tailwind CSS
Architecture & messaging: Microservices, REST, gRPC, WebSocket, Protobuf, Kafka, RabbitMQ
Data & infrastructure: PostgreSQL, MySQL, MongoDB, Redis, Docker, Kubernetes, GitHub Actions, GCP, AWS
Web3 & quality: Ethereum, Solana, smart contracts, OpenTelemetry, Prometheus, Grafana; unit, integration, smoke, and end-to-end testing

PROFESSIONAL EXPERIENCE

Full Stack Engineer | PT Citra International Digital

November 2025 - Present

- Built and maintained real-time messaging and Web3 capabilities across backend services, REST APIs, gRPC, WebSocket, Kafka, OpenIM, and containerized infrastructure for mobile and web products.
- Integrated Ethereum and Solana wallet flows covering wallet creation, transaction processing, smart-contract interaction, event handling, and reliable service-to-service communication.
- Owned backend delivery from requirements analysis and technical planning through implementation, debugging, testing, deployment preparation, and production-readiness checks.
- Implemented Go services and client integrations with PostgreSQL, Redis, REST, WebSocket, and Protobuf; adapted API contracts and strengthened repeatable integration and regression validation.

Backend Engineer | Paper.id

January 2023 - October 2025

- Built and maintained PaperCard, Paper Horizon Card, Paper Pioneer Card, e-Meterai, workflow automation, Open API, and custom client capabilities.
- Designed and optimized microservices for reliable high-volume transaction processing, maintainable integrations, and consistent data across distributed systems.
- Integrated financial partners and enterprise clients including BRI, CIMB, Ayoconnect, and Kopi Kenangan; supported custom invoicing and secure service contracts.
- Developed multi-step approval workflows and reusable external integrations; improved REST contracts, database queries, failure handling, and cross-service data consistency.
- Partnered with product, QA, and DevOps on release verification, code review, production issue analysis, distributed-request tracing, and payment/invoicing reliability.

PROFESSIONAL EXPERIENCE - CONTINUED

Senior Backend Developer | PT Eigen Tri Mathema

January 2021 - January 2023

- Built and maintained large-scale ERP applications and backend microservices supporting multi-module operations and cross-system data consistency.
- Contributed to solution architecture, REST API design, scalability, performance tuning, and query optimization.
- Translated operational requirements into maintainable services, data models, and integrations across ERP modules.
- Led code reviews, technical guidance, best-practice definition, and junior-developer mentoring; collaborated with frontend, QA, and DevOps on delivery quality.
- Owned backend work from requirement clarification and estimation to implementation, documentation, regression verification, and release follow-up.

Web Developer | Freelance

April 2020 - December 2020

- Built and deployed kreatip.id and custom web applications for small businesses and university final assignments.
- Delivered responsive interfaces, content management, forms, authentication, and database-backed workflows; managed requirements, implementation, launch, and maintenance.
- Managed domains, hosting, database setup, backups, deployment, troubleshooting, and post-launch improvements.

IT Support | PT Kurnia Parama Adhara

July 2018 - February 2020

- Maintained workplace PCs, routers, printers, local networks, and ERP applications; diagnosed incidents and performed upgrades and preventive maintenance.
- Supported user setup, software installation, device inventory, documentation, and technical requests; coordinated ERP and network fixes with clear escalation evidence.

SELECTED PROJECT

Founder & Full Stack Engineer | Jajaneun Chili Oil / Oren POS

Active project

- Built an end-to-end POS platform for F&B operations, covering sales, inventory, cashier workflows, product management, stock movement, and reporting.
- Delivered web and mobile applications using React, Next.js, and Flutter with responsive dashboards and cross-platform cashier workflows.
- Own product delivery and business operations from planning to deployment, maintenance, and continuous improvement based on real operational feedback.

EDUCATION

Bachelor's Degree, Information Systems | Universitas Terbuka
July 2023 - Present
Vocational High School, Computer Networking | SMKN 4 Padalarang
July 2015 - May 2018

CERTIFICATION

MTCNA - MikroTik Certified Network Associate | MikroTik
Certificate No. 1712NA8960 | Issued 2017
